DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 are drawn to an air deflector worn about the torso, classified in class 2, subclass 69.
 - II. Claims 7-20 are drawn to an air deflector which can be restraint in a second position, classified in class 2, subclass 94..

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case invention I pertains to an air deflector worn about the torso which is classified in 2/69 and invention II pertains to an air deflector having a closable restraint in the second position that is classified in 2/94.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
